

## P0: Initial Group Selection

Eric Berry

January 26, 2016

My group will consist of myself. I will be solely responsible for P0 - P7. I am aiming to work on something related to multi-parameter persistence and/or the Gleason score project, that is yet to be determined. I found some papers on multi-parameter persistence by Carlsson and Zomorodian that I might look through to gain some more insight. If I end up working on the Gleason score project then I might talk/work some with Sawyer depending on what he is doing.
